11th Triennial

International Marine Biotechnology Conference

Baltimore, Maryland, USA

Join Us Aug. 29 - Sept. 2, 2016!

The International Marine Biotechnology Conference (IMBC) is organized on a triennial basis by the International Marine Biotechnology Association (IMBA). The IMBC is widely recognized as the premier conference in marine biotechnology in the world, bringing together leaders in the field since 1989. With extensive and wide-sweeping support from both the private and public sectors, all IMBCs can boast having excellent attendance by local and international scientists. Learn More.

Located in Baltimore, Maryland for the first time since 1991, the 2016 11th International Marine Biotechnology Conference promises to contain an exciting group of speakers, panels, and educational courses relating to marine biotechnology.

IMBA International MARINE BIOTECHNOLOGY Association Established 1989

International Marine Biotechnology Association

The International Marine Biotechnology Association (IMBA) is a not-for-profit organization to promote marine biotechnology for the benefit of humanity and natural ecosystems. The IMBA works to benefit and inform students, scientists and technologists, decision-makers and industry leaders, industries and governments of the world and facilitate communication among and between practicing experts and the various affiliated marine biotechnology societies and associations.

The IMBA organizes the International Marine Biotechnology Conferences (IMBCs). The IMBCs are widely recognized as the premier conference in marine biotechnology in the world, bringing together world leaders in the field since 1989. With extensive and wide-sweeping support from both the private and public sectors, all IMBCs can boast having excellent attendance by local and international scientists.
