SAVE THE DATE

Australian Ambassador to the USA, The Hon. Mr Joe Hockey
The Embassy of Australia

Invites you to a reception to celebrate the collaborative work of MS Research Australia and the National MS Society as part of the '100 YEARS OF MATESHIP PROGRAM'.

The event will highlight MS research into progressive multiple sclerosis and other areas of the Australia/US collaboration to create a world free of MS.

GUEST SPEAKERS

Professor Stephen Hauser
Director, UCSF Weill Institute for Neurosciences and Professor, Neurology, UCSF School of Medicine
A world leader in developing new treatments for MS. Recognised for scientific work that challenged the current thinking about MS. Hauser's discoveries have opened new therapeutic avenues for highly effective treatments for this severe chronic illness.

Dr Matthew Miles
CEO, MS Research Australia and
Vice Chair of the International Progressive MS Alliance

Cyndi Zagieboylo
